

BHAVESH SINGH

Mumbai ,Parel 400012

✉ bhaveshsinghbiz@gmail.com  [LinkedIn](#)  github.com/BhaveshSSingh

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, HTML/CSS, SQL

Frontend Technologies: React, Redux, Material-UI, Next.js, Webpack, Babel

Backend Technologies: Node.js, Express, MongoDB, Redis, RESTful APIs

Developer Tools: VS Code, Git, GitHub, Docker, AWS, Shopify API

Other Skills: Responsive Design, Performance Optimization, Team Leadership, Mentoring

Experience

Schbang Labs

Present

Team Lead - Building AI Solutions

Mumbai, India

- Researched and improved RAG (Retrieval-Augmented Generation) output by 3x using modern RAG preprocessing techniques and vector database optimization.
- Architected and developed Expertap UI with Redux state management, improving code maintainability by 60% and developer experience.
- Led cross-functional team of 5 engineers to build various products, collaborating with stakeholders and ensuring successful project delivery.
- Led frontend architecture and development for Schbang Labs website, implementing modern React patterns and performance optimizations that increased page load speed by 40%.

Level SuperMind

Jul 2023 – Dec 2024

Software Engineer

Mumbai, India

- Rebuilt Level SuperMind website from ground up using Next.js, achieving 45% faster load times and 25% increase in user engagement.
- Managed backend development for Level SuperMind platform serving 10K+ daily active users.
- Led frontend engineering initiatives across Level SuperMind platform, implementing modern React architecture and user experience improvements.
- Built encrypted journal feature from scratch using AWS KMS encryption, ensuring enterprise-grade security for 50K+ user entries.
- Developed Duolingo-like streak feature with gamification elements, increasing user retention by 35% and daily active users by 40%.
- Improved backend performance by 60% using in-memory caching and global caching strategies with Redis, reducing API response times from 800ms to 320ms.
- Created unified Ads Dashboard optimizing Facebook, Instagram, and Snapchat campaigns, managing \$100K+ monthly ad spend and increasing marketing ROI by 45%.
- Built commission-based partner program platform with Stripe integration, achieving 50% increase in partner sign-ups and streamlined automated payouts.
- Developed internal CleverTap mail platform for user communication, reducing email delivery time by 70% and handling 100K+ monthly emails.
- Built custom user activity tracking tool using rrweb (Microsoft Clarity alternative), providing detailed user journey analytics for 15K+ sessions monthly.
- Led and built SuperSoul astrotech platform, implementing AI-powered astrology solutions.

Education

Lokmanya Tilak College of Engineering

Dec 2022

Bachelor of Engineering in Mechanical Engineering — Major GPA: 8.0

Mumbai, MH

Key Achievements

Performance Optimization: Improved backend performance by 60% through strategic caching implementations

User Growth: Increased user retention by 35% and daily active users by 40% through gamification features

Revenue Impact: Built SuperSoul platform generating \$200K+ revenue in first quarter

AI Innovation: Enhanced RAG output by 3x using advanced preprocessing and vector optimization

Team Leadership: Successfully led cross-functional team of 5 developers across multiple high-impact projects
